According to the most recent version of Autodesk's most-recently reported annual revenues, AutoCAD revenues fell 20 percent in the last reported year to approximately \$500 million. But revenues in the last three years — 2015, 2016, and 2017 — were \$450 million, \$480 million, and \$530 million, respectively. Today, there are approximately 39 million installations of AutoCAD worldwide. AutoCAD is used to create 2D and 3D designs for a variety of industries, including architecture, construction, engineering, manufacturing, real estate, and transportation.

AutoCAD is also used to automate repetitive tasks, create reports and drawings, manage projects, and sell property. What is AutoCAD? AutoCAD is a computer-aided design (CAD) software application developed by Autodesk. AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. Before AutoCAD was introduced, most commercial CAD programs ran on mainframe computers or minicomputers, with each CAD operator (user) working at a separate graphics terminal. AutoCAD is also available as mobile and web apps. AutoCAD is a popular desktop software application for 2D and 3D CAD drafting and graphic design. Most CAD/CAM software applications have been superseded by more powerful and faster applications, which may cost significantly more than AutoCAD. For example, a powerful CAD package like SolidWorks costs many hundreds of thousands of dollars, which is beyond the budget of most firms. Autodesk is the world's largest software company, according to Forbes magazine. Autodesk's 2015 revenues of \$5.3 billion were roughly 20 percent higher than the \$4.4 billion that Autodesk's revenues
