Shop by brand: The world's first, and still only, fully outdoor furnace with safe, smart, and easy-to-operate systems. Full-service furnace units and refrigeration, hot air and heat pump units are all available at HomeSmith's. Everything you need is available at HomeSmith's, from residential furnaces and heat pumps to commercial and industrial heating and cooling solutions. Parts, service and repairs are all available for all makes and models. We provide everything you need, from the first furnace installation to an annual inspection, and all life-cycle repairs. Our service technicians and specialists are factory certified, and we back our work with industry-leading warranties. We service all makes and models, including oil, gas, propane, and electric appliances. We're your Energy Efficient Choice! Our Service and Repair Department is Here to Help Discover the many reasons to trust HomeSmith's for your heating and cooling needs. Our service technicians are factory-trained and certified for any heating and cooling repair. We offer affordable and dependable service. Our highly qualified technicians provide emergency service around the clock. This means you can rest assured that you are always covered. We are committed to doing it right the first time. If one of our technicians finds a problem with your appliance, it will be repaired right away. We perform efficient repairs with high-quality materials that stand up to the rigors of commercial and residential heating and cooling. This means you can save money through extended equipment life. We service most brands and models and we have factory-trained specialists for any make or model. We offer warranties on some of the best home heating and cooling appliances on the market.Q: Representing a user interface for importing data in a database So the context is that I have a Jupyter notebook that generates files (or JSON files) describing data which are then imported into a SQLite database. What I want to do now is create a user interface for this. I see two parts: The first is generating the data files (and presenting what it is doing in some way) The second is the import. A great example of what I want is the table of contents/index builder that many web resources use. My (quite vague) take on the first part of the problem is that I want to build an HTML (or better Word/Powerpoint) presentation that describes
