Each cell of the table view should have a "checkmark" to indicate selected items. I need a simple way to implement it. Any idea how to do it? A: UITableView has a class called UITableViewCellAccessory. UITableViewCellAccessory.Checkmark will return you YES if the cell has been selected. For your reference, take a look at this blog post Q: How do I determine the current FPS in Three.js? Is there a way to determine the fps of an application using Three.js? A: You can use var currentFPS = 1000/clock.getDelta(); A: var fpsCounter = performance.now(); //set fpsCounter to frame rate performance.now(); returns a number in milliseconds Ras protein: a molecular integrator of the signal in the phosphoinositide 3-kinase pathway. Phosphoinositides play crucial roles in a broad range of cellular functions, including signal transduction. Ras proteins and phosphoinositides are known to be involved in regulation of both Ras signal transduction and production of phosphoinositides. It is possible that their interactions are linked in a regulatory cascade, but the molecular mechanism of such interaction is not yet elucidated. In this report, e79caf774b
